ARIADNA MONTSERRAT RAMÍREZ MATÍAS

Fullstack Web Developer | Frontend · React · TypeScript · UX/UI

ariadnamts98@gmail.com · +52 951 218 9458 · linkedin.com/in/ariadnaramirez · github.com/AriadnaRamirez · Portfolio

PROFILE

Fullstack web developer specialized in Frontend, React, and TypeScript, with hands-on experience in SaaS products, websites, and custom solutions for real clients; I build responsive interfaces, reusable components, and REST API integrations, taking part from needs analysis and UX/UI through implementation, debugging, and deployment. I combine frontend development, UX/UI judgment, and analytical thinking to create functional experiences aligned with user and business needs, with complementary experience in web optimization and basic SEO applied to real projects. I use generative AI as a support tool in design, prototyping, and development, reviewing, adapting, debugging, and validating generated code.

EXPERIENCE

Freelance Web Developer — Independent work Aug 2026 — Present · Remote

I work directly with the client, from the business need to the published site.

PROJECT: Grupo CRM Extintores

crmextintores.com.mx

- A product page appears on Google's first page for “extintores Cuajimalpa”.
- Implemented a 50+ product catalog with individual detail pages, services, FAQ, contact, and WhatsApp quote CTAs.
- Defined navigation and content for clarity and conversion, and published the site on Vercel with its own domain.

Web Developer — GROVA Marketing Project-based · Aug 2025 — Aug 2026 · Remote

Websites and digital products for agency clients, focused on frontend, UX/UI, APIs, and maintenance.

PROJECT: SENDA

- Built features for a multi-store SaaS SPA for managing appointments, patients, services, products, and staff.
- Implemented 12 CRUD forms across 8 entities with React, TypeScript, Formik, and Yup, and extended a dynamic form system based on JSON configurations.
- Connected the frontend to REST APIs with JWT and Zustand (session and store), and worked in Git with branches, pull requests, and code review.
- The appointment calendar, the forms for all 8 entities, and business switching shipped, without mixing data across stores.

PROJECT: HMDV — Hotel Marqués del Valle

hotelmarquesdelvalle.com.mx

- Conducted UX/CX audit, page architecture, wireframes, and high-fidelity prototype in Figma/Figma Make with marketing and leadership.
- Built the complete frontend using React, TypeScript, and Vite.
- The live site is bilingual (ES/EN) and multi-currency, with price and capacity on all 3 rooms and booking available across the whole navigation.

PROJECT: FitPlus

- Managed content updates and changes for promotional campaigns in production using WordPress and Elementor.

PROJECTS

AWS Study Lab — Personal project · Next.js · NestJS · PostgreSQL
aws-practitioner-study-lab.vercel.app

- App for AWS Cloud Practitioner: 352 cards, 208 questions, and a 65-question exam in 90 minutes. Vercel, Render, and Neon.

CCST Study Lab — Personal project · Next.js · NestJS · PostgreSQL
ccst-study-lab.vercel.app

- App for Cisco CCST Cybersecurity: 51 cards across 5 types and server-side grading. Vercel, Render, and Neon.
- October 6–19, 2026: 230 users, 507 sessions completed, and 15,792 answers graded on the server.

ServiYApp — Student project · Frontend Developer · Team of 6 · Next.js · React · TypeScript · Zustand · Socket.IO · Mercado Pago · Tailwind CSS

- At-home beauty services marketplace with client, provider, and admin panels; I built the backoffice with metrics and document approval.
- Implemented authentication, Google OAuth, role-protected routes, and session persistence with Zustand and JWT.
- Integrated Mercado Pago checkout with support for MXN, COP, and ARS.
- Built the real-time chat end to end: the NestJS WebSocket gateway with Socket.IO and, on the frontend, history, online/offline status, typing indicator, and read receipts.
- 170 commits of my own in the frontend (70% of the repository). Deployed on Vercel and Render.

EDUCATION

SoyHenry — Full Stack Web Developer Bootcamp May 2025 — Nov 2025
+800 hours · React · Node.js · TypeScript · PostgreSQL · Git/GitHub · Scrum

EBAC — UX/UI Design Diploma 2024

Universidad La Salle Oaxaca — B.S. Civil Engineering 2015 — 2020
GPA 9.2/10 · Class valedictorian · Hermano Miguel Febres Cordero Medal · Honors

The University of Kansas — Graduate Studies in Civil Engineering Aug 2022 — Jan 2023

ADDITIONAL TRAINING

Generation Mexico — AWS re/Start + AI Foundational · Cohort 03 Selected · Full scholarship · Starts Oct 12, 2026
Intensive training program in cloud computing, AWS, Linux, networking, and artificial intelligence (15 weeks). Planned official AWS certifications upon completion: AWS Certified Cloud Practitioner · AWS Certified AI Practitioner.

EPAM — IT Operations and Support Training Program Oct 12 — Dec 5, 2026
Training program focused on IT Support, IT Operations, Service Management, Knowledge Management, troubleshooting, and technical support.

Global HITSS — Global HITSS Talent Seedbed Sep 28 — Dec 17, 2026
Training and first tech job program aimed at bringing junior talent into the IT labor ecosystem through practical training and mentorship.

Junior Achievement Americas — Mujer Digital · 7th cohort 2026 · In progress
Training in cybersecurity, networking, and support, with employability mentoring.

SKILLS

Frontend: React · Next.js · TypeScript · JavaScript · Vite · HTML5 · CSS3 · Material UI · Tailwind CSS · Zustand
Backend & APIs: Node.js · NestJS · REST APIs · JWT · Prisma · TypeORM · PostgreSQL · Socket.IO · SQL
UX/UI: Figma · Figma Make · UX Audit · Wireframing · Prototyping · Formik · Yup · Zod · Chrome DevTools · Insomnia
Web: Responsive Web Design · Web Performance · WordPress · Elementor · Basic SEO · Local SEO
Cloud & Deployment: Vercel · Render · GitHub Pages
Development & AI: Git · GitHub · Branching · Pull Requests · Cursor · Codex · GitHub Copilot

CERTIFICATIONS

Full Stack Developer Certificate — SoyHenry 2025

UX/UI Design Diploma — EBAC 2024

Cisco Certified Support Technician (CCST) In progress

Cisco Digital Badges 2026
Introduction to Cybersecurity · Networking Basics · Networking Devices and Initial Configuration · Endpoint Security · Network Defense · Cyber Threat Management

Python for Data Analysis · Programming with Python — Emerging Technologies Institute 2020

LANGUAGES

Spanish: Native · English: Advanced (C1) · TOEFL iBT 100/120 · 2026
